

This email is to express my opposition to the CBA's attempting to impose the federal "established business relationship" exemption to Indiana consumers no call list. Just because I have done buisness with someone in the past or present doesn't give them the right to invade my privacey.

Also like my self many people are dropping land lines and going Cellular. If this passes, and we answer the phone, we have to pay for the call. This wrong and I stand firmly against it.

Concerned,  
Paul S. Green
